

02 Preprocessing Pipeline Report

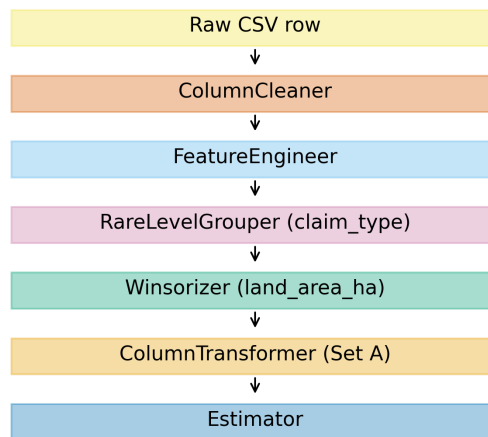

Disclosure: all results use the synthetic fra_synthetic_claims dataset. Scores may reflect generator rules. Real-world performance is unknown. This demo must not drive real claim decisions.

1. Leakage audit

committee_level_reached and processing_days are partly consequences of outcome. Set B is process-aware and documented as partly circular.

rejection_reason probe: {"column": "rejection_reason", "single_feature_macro_f1": 0.5826345778889412, "allowed_in_set_A": false, "allowed_in_set_B": false, "reason": "Non-null only when status is Rejected: perfect target leakage for status."}

Figure 6. Preprocessing pipeline (Set A)

2. Transformations

Empirical comparisons cover winsorizing, log1p, RobustScaler for linear models, one-hot and ordinal encoding, and fold-safe district aggregates.
